The force of nature

Henriëtte Faroche has a very extensive skin care line, where all products have one thing in common: the force of nature. The ancient science of pure products combined with the latest and most modern insights into skin care.

The extensive skincare line offers products for every skin type, as well as having many special care products that can be used in addition to any product range.

Home care

The Henriëtte Faroche products for home care are the perfect addition to the treatment given to you by your Henriëtte Faroche Beautician. By carrying out a skin diagnosis, your Henriëtte Faroche Beautician can determine exactly what products are suitable for your skin type and best achieve their goal.

Because a cream is never just a cream; every skin is different and requires its own specific treatment and specially tailored products. Good everyday care keeps your skin in good condition. You can also give your skin that extra bit of pampering by using products that are specially tailored to the products for everyday use. In this brochure, you will find the relevant care products for each skin type. These treatments have a definite structure: you start with a basic treatment and as the condition of your skin improves, you go onto the more intensive, more luxurious treatments.

Intégral

The products from the Intégral series contain products for cleansing the skin. The line consists of a deep cleansing wash gel for cleansing the skin, an eye make-up remover, a dual-phase eye make-up remover for waterproof make-up, a lysing and a soft scrub for removing dead skin cells and impurities from the top layer of skin.

The products from the Intégral line are suitable for use in addition to any other product line and are suitable for any skin type.

Hydrasence

The Hydrasence series is suitable specifically for dry to very dry skin. This skin type has fine, barely visible pores and soon starts to feel tight. The skin loses its elasticity and reacts straight away to the free radicals we are exposed to every day. The thin keratin layer is unable to retain water, causing it to become increasingly dehydrated. The skin appears matte, sometimes even flaky, and when applying make-up, wrinkles caused by dryness often become extra visible.

For use at home, the range consists of a Hydrasence 24-hour cream and a Hydrasence Faramatique concentrate. The Hydrasence cleansing milk and lotion can be used to cleanse your skin. To give your skin an extra boost, we recommend using products from the Intense line.

Facial treatment

Hydrasence basic treatment

This treatment for dry to very dry skin hydrates and nourishes the skin, promoting and improving cell renewal. Repairing the cell structure prevents excessive moisture loss. The softening and protective products used in this treatment keep the skin in optimal condition.

Matifiante

The Matifiante series is especially for oily/problem skin. This skin type shows an excessive separation of fat due to an excess of sebum. Causes radiant skin, enlarged pores, skin irritation and spots. This skin type requires intensive and consistent care.

For use at home, the line consists of a Matifiante 24-hour cream and a Matifiante Faromatique concentrate. The Matifiante cleansing mousse and lotion can be used to cleanse your skin.

Facial treatment

Matifiante basic treatment

Treating problem/oily skin provides a deep cleanse that prepares the skin for further rejuvenating and softening treatments. Any impurities and excess sebum secretion are removed. Softens and hydrates the skin.

Sensilence

The Sensilence series is a series specifically for sensitive skin. This skin type may respond rapidly with red blotches or skin irritations under external influences. This skin must be protected against influences such as sun, heat, cold, dry air, air pollution and numerous other factors that a sensitive skin may respond to. This skin may also feel tight.

For use at home, the line consists of a Sensilence 24-hour cream and a Sensilence Faromatique concentrate. The Sensilence cleansing milk and lotion can be used to cleanse your skin.

Facial treatment

Sensilence basic treatment

The treatment of sensitive to very sensitive skin creates a protective effect against external influences. It encourages the skin's recovery and has a moisture-regulating effect. It also softens the skin, removing red blotches and preventing them from appearing so often.

Collastine

More mature skin shows the first signs of sagging due to a reduced presence of collagen and elastin. This sagging may begin as early as your 25th birthday. The sagging can occur in dry/sensitive skin, as well as in combination/oily skin. Early intervention can delay the formation of wrinkles.

For use at home, the line consists of a 24-hour cream for dry/sensitive skin or a 24-hour cream for combination/oily skin.

Facial treatment

Collastine basic treatment

This treatment for more mature skin has a boosting effect, ensuring that the collagen makes the skin supple and resilient again. If treatment is carried out early on, the formation of wrinkles can be delayed considerably and existing wrinkles softened. The face is made firmer and your complexion will be radiant.

Hyposense

The Hyposence series is a skincare range that has been developed specifically for sensitive skin. This skin type can become irritated more quickly under external influences and must be protected against influences such as the sun, heat, cold, dry air, air pollution and numerous other factors. The skin is thin and has a fine structure and can therefore feel tight and appear red. All Hyposence products are based on Dead Sea minerals and contain a hypo-allergenic perfume, making them perfect for sensitive skin.

For use at home, the Hyposence range consists of a 24-hour cream, a serum and a peeling. Hydrophilic oil can be used to cleanse your skin.

Facial treatment

Hyposence basic treatment

De Hyposence behandeling is speciaal ontwikkeld voor de gevoelige huid. Deze wordt door de Hyposence producten optimaal gehydrateerd. De huidstructuur wordt verbeterd en deze wordt zacht en soepel. De behandeling zorgt voor een helder en stralend effect.

Brilliant

For the more mature skin and the skin that requires more attention, there is the Brilliant series, enriched with vitamin E. This skin type is often very sensitive to atmospheric influences such as sun, wind and cold, but also to soap and alcohol. The skin often shows signs of widening of the surface capillaries, otherwise known as the teleangiectasies. These widened capillaries shimmer like fine red threads through the skin and must be very well protected. Because this skin type often struggles to bind moisture, the keratin layer soon becomes dry. Thanks to its nourishing and protective effect, the skin will become firm and elastic once again.

For use at home, the range consists of a Brilliant 24-hour cream and a Brilliant Faromatique concentrate. The Brilliant cleansing milk and lotion can be used to cleanse your skin.

Facial treatment

Brilliant treatment enriched with vitamin E

This treatment with vitamin E products has been designed especially for skin that requires more intensive care. This nourishing and protective treatment ensures that the skin becomes supple, firm and elastic once again. The microcirculation is being improved, which helps to create a radiant complexion. This treatment is often used on skins with teleangiectasies.

Farorisan

The Farorisan cream is intended specifically for the more mature, sallow skin which shows signs of blockages here and there due to hormonal factors, for example. The fruit acids in this cream improve the condition of the skin and aid hydration. Cell renewal is stimulated, causing under-skin blockages to be eliminated faster.

For use at home, there is the Farorisan 24-hour cream.

Facial treatments

Farorisan fruit acid treatment

Fruit acids stimulate cell renewal. If your skin is showing signs of blockages/under-skin blockages here and there, or if your skin appears sallow, a fruit acid treatment is ideal. After winter or if you are experiencing hormonal problems, this is an effective treatment. Especially if you support this home treatment with the Farorisan 24-hour cream.

Farorisan Diamond fleece mask treatment

As a result, skin (temporarily) has poor circulation, lacks vitamins and the energy to carry out its functions properly. The Farorisan Diamond fleece mask ensures that the skin is kept well hydrated and is better able to retain moisture. The treatment ensures a healthy, fresh and energised appearance.

Active Age anti-rides

This ceramide line is specifically intended for dry/sensitive, more mature skin. As you become older, the skin structure becomes saggier and the skin shows signs of deep creases, causing wrinkles to form. The surface of the skin and the pores become more pronounced, and the keratin layer becomes cracked, causing a lack of moisture to occur. The ceramides contained in these creams are the skin's own, so they can penetrate into the deeper layers of skin and thereby work intensively on the aforementioned points.

For use at home, the range consists of two different 24-hour creams: hydrating cream and anti-ageing cream.

As a special treatment, there are the Active Age anti-rides eye pads, which cause lines and wrinkles around the eyes to fade.

Extra care

Active Age Eye lift pads

The first signs of skin ageing first become visible around the eyes. Fatigue is also first visible around the eyes.

Give your eyes extra attention with the Active Age Eye Lift pads, which cause lines and wrinkles to fade. These eye pads can also be used on bags and dark circles, alleviating heavy, weary eyes and giving a fresh look.

The Active Age Eye Lift Pads can be used in combination with any Henriëtte Faroche product line, so they form the perfect addition to your overall skin care routine.

Facial treatments

Active age anti-ageing treatment

The skin's own substances can penetrate the different layers of skin more deeply. This anti-ageing treatment uses products that contain ceramides. These ceramides are the skin's own substances, which stimulate the formation of collagen in the skin from the inside out. Collagen strengthens the skin. A treatment perfect for a more mature relaxed skin.

Active age hydrating face protection

A treatment specifically for dry skin. This treatment uses a facial film mask. This facial film mask has strong hydrating properties and consists of pure active substances, namely collagen and caviar extract. The collagen and caviar in this mask also strengthen the skin intensively. This treatment is also ideal for use on oily/problem skin.

Active Age Eye Lift

The Active Age Eye Lift pads are available for use at home, but can also be used during your skin care treatment in the salon. This additional care for your eyes can be incorporated in any Henriëtte Faroche treatment.

FaroTherm

The FaroTherm Modelling mask is a very unique mask that is perfect for restoring the skin's moisture balance. The rich components applied under this mask ensure that, through the heat given off by the mask, these substances are optimally absorbed by the skin.

For all skin types except very thin skins and skins with teleangiectasies, active acne and erythema.

Stimulates blood circulation.

Facial treatment

FaroTherm modellage treatment

This treatment uses the FaroTherm modelling plaster mask. The closing and warming properties of this plaster mask make this mask absorb the active substances applied underneath more deeply. By covering the face correctly, this mask has a very modelling effect on the skin.

Protection & anti-ageing mask

This mask is intended specifically for the more mature skin. As you become older, the skin structure becomes saggier and the skin shows signs of deep creases, causing wrinkles to form. The surface of the skin and the pores become more pronounced, and the keratin layer becomes cracked, causing a lack of moisture to occur.

The rich ingredients, including cranberry, strawberry, raspberry and blackcurrants, act as multivitamins for the skin. The red fruit contains a high dose of antioxidants, which protect the skin against free radicals and delay skin ageing.

Facial treatment

Protection & anti-ageing mask treatment

This Protection & anti-ageing mask is the perfect peel-off mask for combating skin ageing. The treatment is a real salon treatment. Following application, the mask changes structure to a rubbery mask, so it can be removed in one go like a kind of second skin.

Vitamin C

Vitamins have a stimulating effect in the boosting effect of the skin. Vitamin C has a multitude of influences on the biochemical damage and effect in the skin. Vitamin C acts as an antioxidant, which means that it protects the cells against free radicals that are generated, in particular through sunlight but also through smoking. The formation of collagen is also encouraged, giving the skin greater flexibility and strength. Vitamin C prevents the excessive formation of melanin. Melanin is the pigment in the skin that's responsible for age spots, for example. Vitamin C prevents this. Vitamin C is known as an antioxidant that protects the skin against ageing.

For use at home, the range consists of a 24-hour cream and an eye cream. In addition to the cleansing products from the Intégral range, there are different cleansing products available that are tailored to your skin type. To give your skin an extra boost, we recommend using products from the Intense range.

Facial treatments

Vitamin C facial treatment

A treatment that has an intensely nourishing and hydrating effect on the skin. Vitamin C stimulates cell renewal in the skin, as well as protecting against free radicals even more than vitamin E.

Vitamin C lift-off treatment

Dermatologists have agreed for many years that water is the most important component in the skin, as it ensures that the skin maintains its youthful appearance. The spa vitamin C lift-off treatment uses a mask that hydrates the skin completely. Within a few minutes, this mask becomes a fine rubber layer that starts to tighten the skin, so this treatment has a very lifting and softening effect.

Caviar Derma Concept

Caviar Derma Concept is an innovative anti-ageing cream that contains the most modern high-tech ingredients. Caviar extracts change the skin. Tired skin immediately turns into a firmer, radiant skin with a soft appearance. It gives an extra dose of energy and is very moisture-regulating. The result is a radiant complexion and a fresh skin that's full of vitality.

For use at home, there's the Caviar Derma Concept 24-hour cream, Caviar Derma Concept eye cream and the Caviar Derma Concept serum. In addition to the cleansing products from the Intégral line, there are different cleaning products available that are tailored to your skin type. To give your skin an extra boost, we recommend using products from the Intense line.

Facial treatment

Caviar Derma Concept treatment

This high-energy caviar treatment ensures intense skin rejuvenation. The high-quality active substances ensure that the cells are intensely cared for and ensure intensive strengthening of the skin's barrier. It gives an extra boost of energy and is very moisture-regulating.

Intense

The products from the Intense line have been specially developed to give the skin an additional boost. This line consists of various masks, ampoules, an eye gel and an eye roller. Each product has its own added benefit and will ensure that the skin is optimally stimulated.

Masks

Cell Herstellend masker

This mask protects the skin and has a regenerating and deeply hydrating effect, making the skin firmer and giving it greater elasticity. This mask is perfect for skin that is frequently exposed to the sun or a very dry skin, which will age more quickly.

Hydrovital mask

This oxygen active hydrating mask improves cell metabolism, encouraging cell renewal. It has a strengthening effect and slows down the skin ageing process, improving the condition of the skin.

Vitamin A-C-E mask

This intensive mask contains vitamins A, C and E, which support the most important functions of the skin. The different vitamins are already known for their strengthening, restorative and anti-oxidising properties.

Anti-Puffiness eyegel

This nourishing eye gel has been specially formulated for the sensitive skin around the eyes. The eye gel reduces signs of fatigue, helps with fluid circles (oedema) and gives a fresh look!

Ampoules

Multi hydrovital ampullen

A moisture-regulating ampoule for dry skin. Helps prevent wrinkles and encourages cell division.

Vitamine repair complex ampullen

This vitamin-rich ampoule ensures excellent moisture regulation and has a revitalising effect on any skin type.

Lifting gelee royal ampullen

Royal jelly are nutrients for the queen bee that activate the circulation and help to firm any skin type. For a radiant and even complexion.

Jojoba & vitamine E vitalizer ampullen

The jojoba-based ampoule is enriched with vitamin E. Vitamin E is known for improving the skin's elasticity and hydration. Vitamin E protects the skin against the negative effects of UV rays and air pollution. Especially suitable for very dry and more mature skin.

Caresse des Mains

Caresse des Mains handcrème

A softening and hydrating hand cream for the everyday care for your hands and nails. Forms an invisible, non-greasy film on the skin.

Faromatique

Henriëtte Faroche has combined specific natural oils, essential oils, plant extracts and vitamins so that the Faromatiques have a problem-solving effect on specific skin complaints. An ancient science of pure products combined with the latest and most modern insights into skin care. There are four different Faromatique concentrates, tailored to each skin type. Your Henriëtte Faroche Beautician can advise you on which Faromatique concentrate is suitable for your skin type.

Facial treatment

Hydrasence

Nourishing and hydrating concentrate with macadamia oil that alleviates dry skin. The concentrate is enriched with vitamins A, E and F and essential oils of ginger and lemon.

Mafitante

Nourishing and hydrating concentrate with borage oil that nourishes oily/problem skin. The essential oils of rose geranium, lemon grass and corn mint are known for their positive effect on oily/problem skin.

Sensilence

Nourishing and hydrating concentrate with avocado oil that alleviates sensitive skin. The concentrate is enriched with vitamins E and F and essential oils of real lavender and Italian cypress.

Brilliant

Nourishing and hydrating concentrate with almond oil that nourishes mature skin. The concentrate is enriched with vitamins A, E and F and essential oils of orange and carrot extract.
